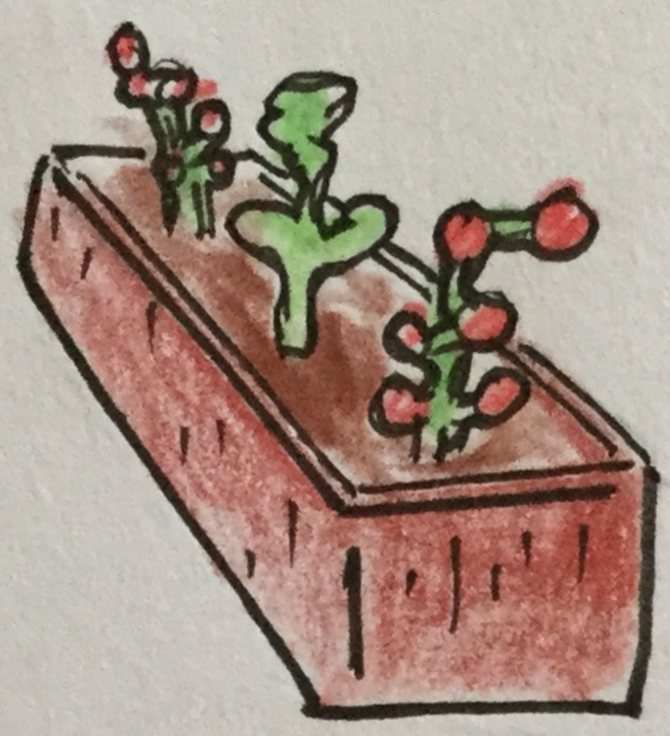
MY
APARTMENT'S
BACKYARD

A while back, I moved into a new apartment

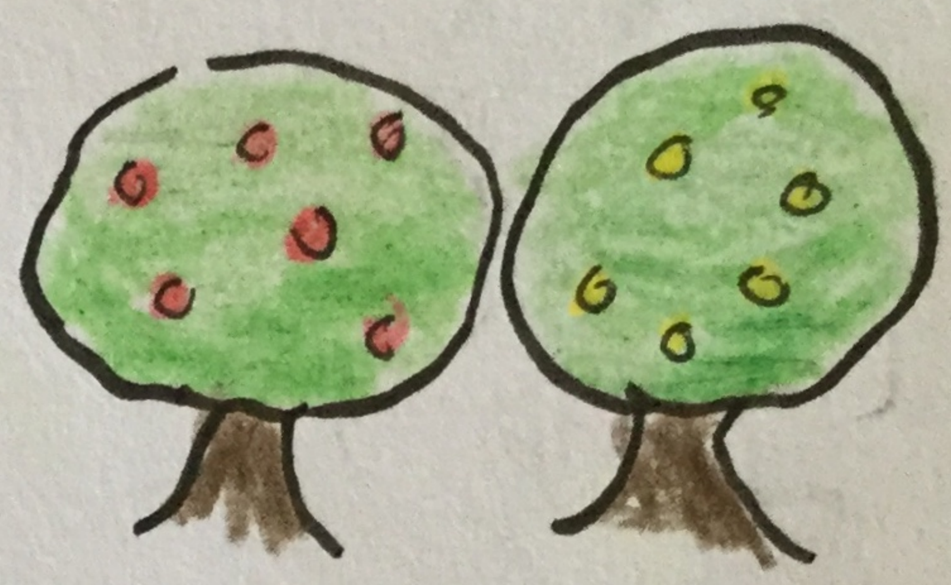
The communal backyard
was a lone franjipani
& a clothesline.

However, upon meeting my neighbours, we all agreed we would like a nicer backyard

We held a working bee. We planted:



Veggie boxes



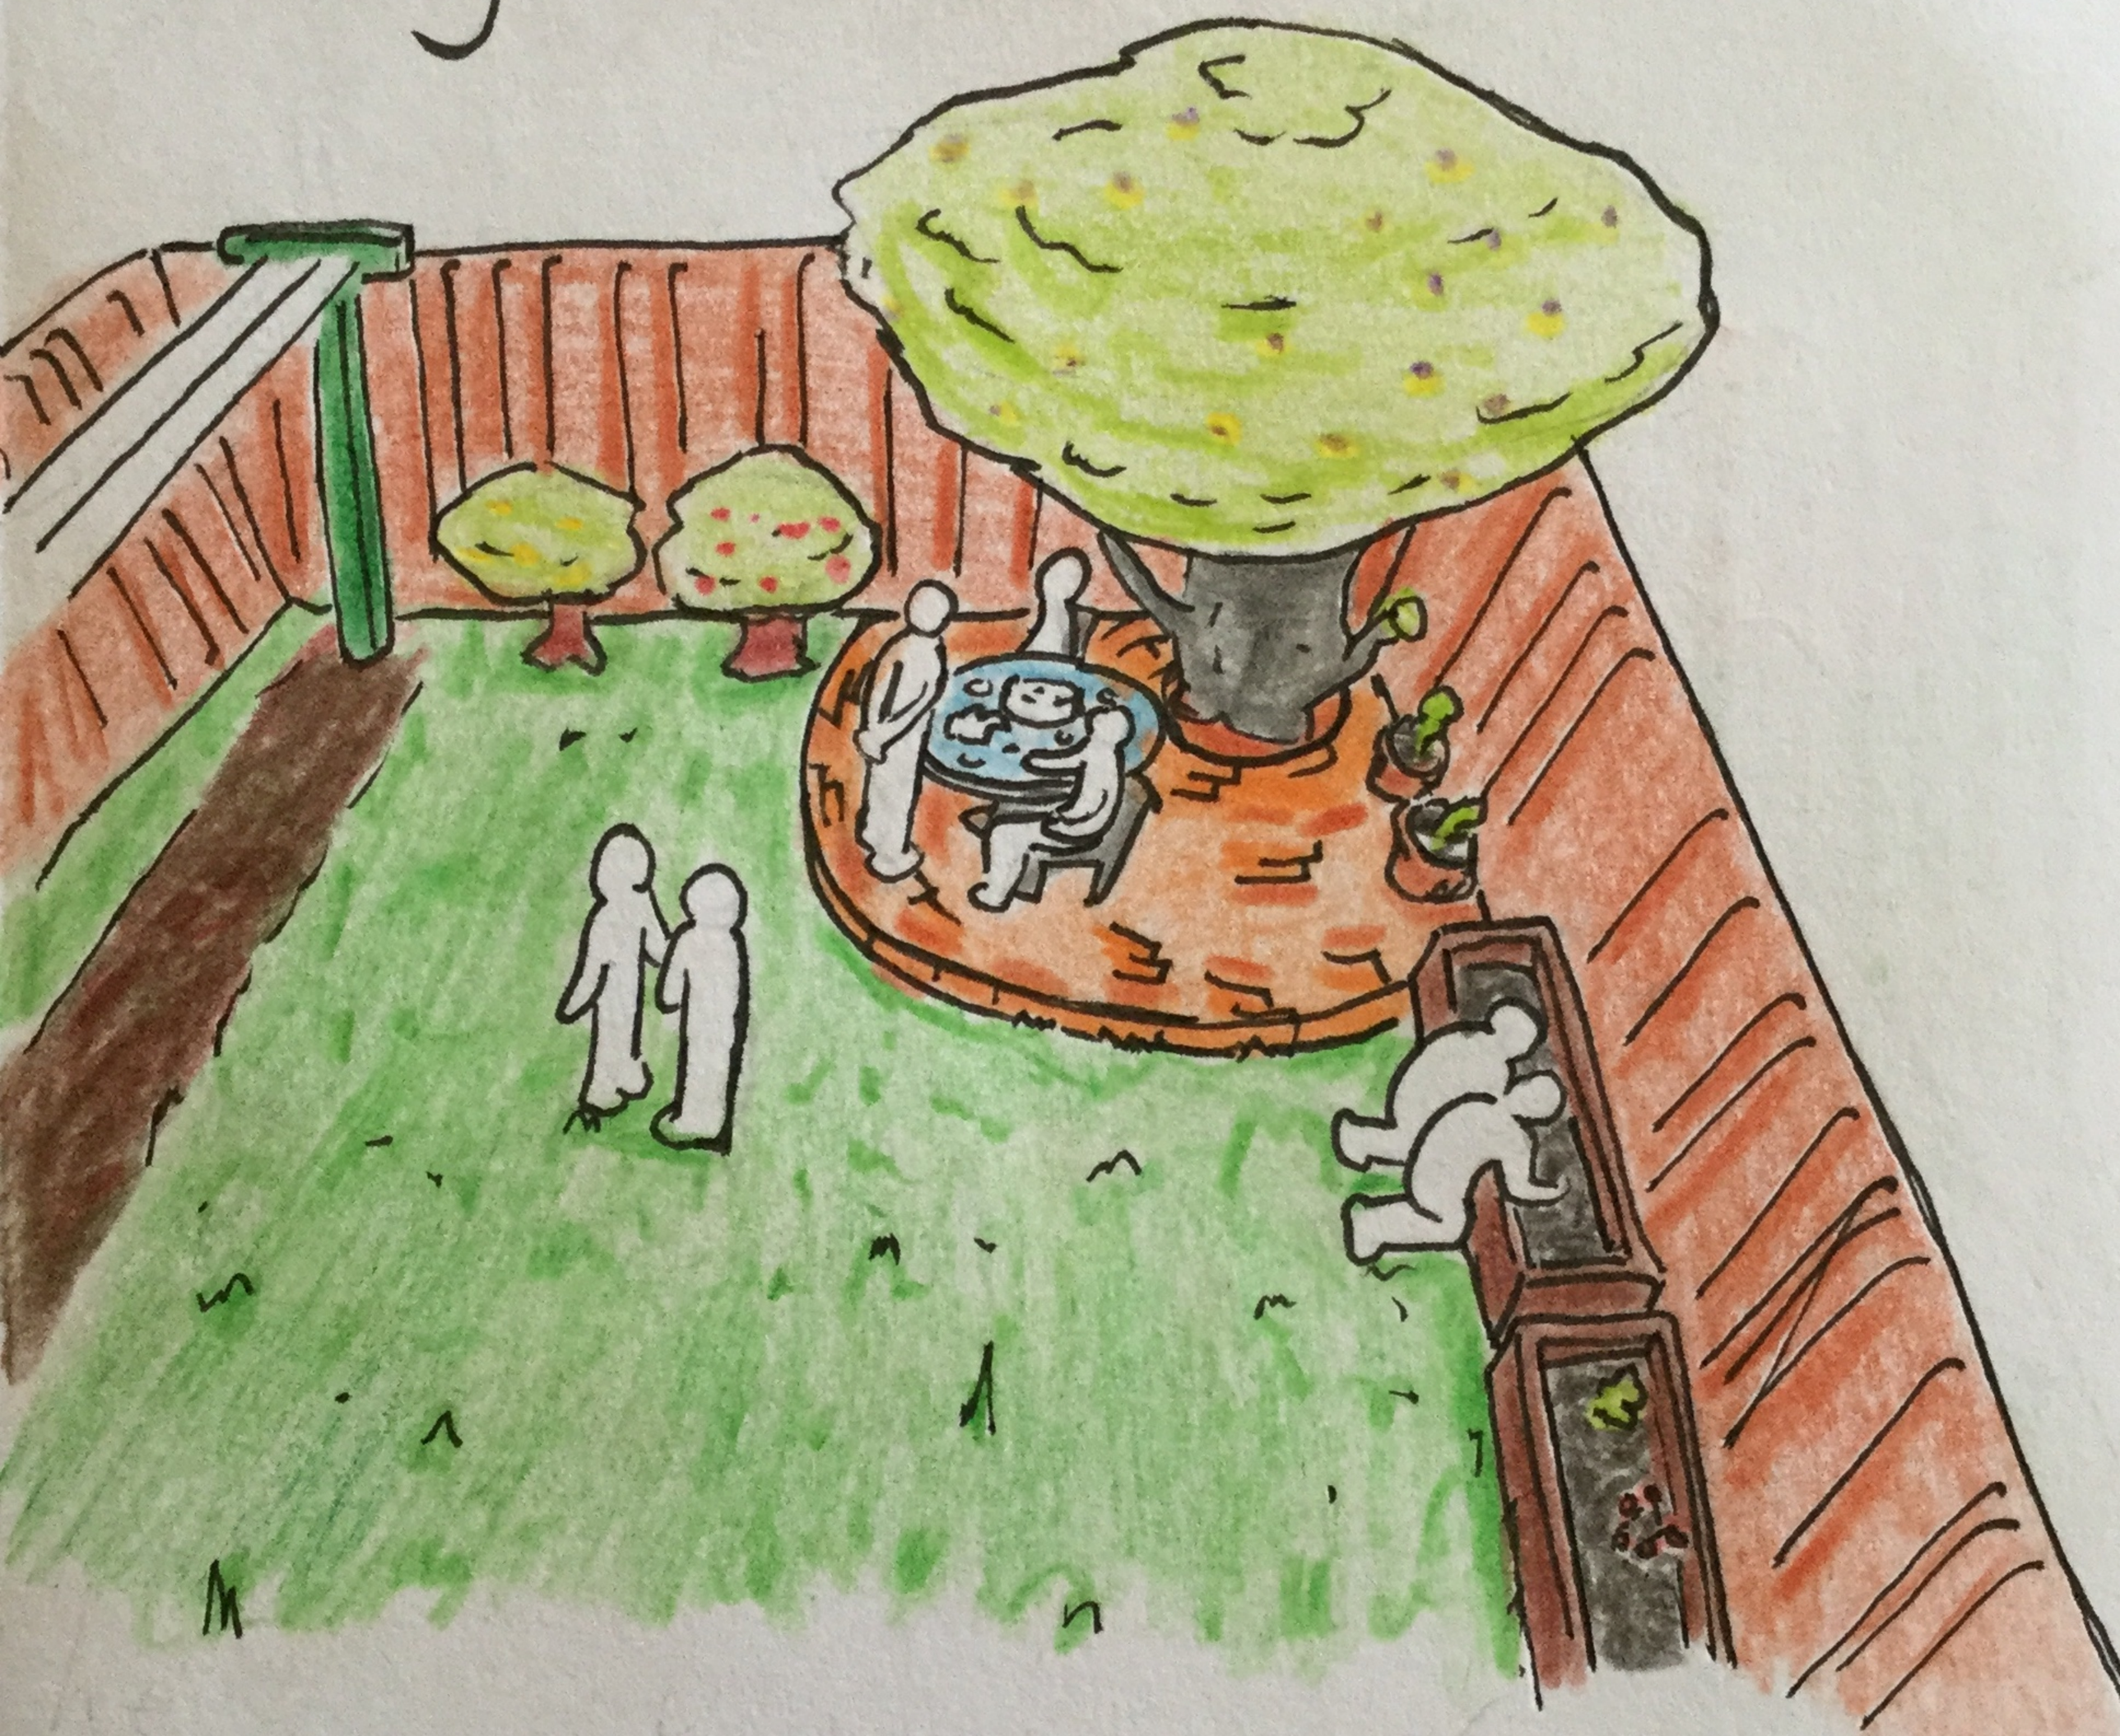
Fruit trees

A fig tree

Pot plants

We even made a lovely patio under the franjipani

The working bee
along with tea & cake



helped us better know
our neighbours

My apartment's backyard is now a wonderful place to share.
