Hi everyone,

Welcome back to Uni for another year. Whether it's a passion for your subjects or the desire to get your degree and get outta here, Arc has the cold beer and engaging society events to ground your time on campus. Whatever your motivation for being at Uni, Arc will ensure your student life is something you never forget.

I hope everyone managed to experience some aspects (if not all) of the magnificent week O-Week 2015 was! A huge congratulations to the whole team that put it together.

If you want to know more what Arc does, hit our website! In particular check out the Board Blog - it explains what the Board of Directors does and my role as Chair of the Board. Even if you don't read it all, please check out the page. I have a sneaky suspicion some of the team like to keep track of the amount of hits (or not) the page gets…

Finally, if you have any questions, queries or concerns about Arc, shoot me an email.

Aloha readers!

We’re your new Blitz team, and we’re stoked to be bringing you all the cool events, student goss and competitions this year, with even more awesomeness on blitz.arc.unsw.edu.au. O-Week is over (and it was epic) but the fun will continue with plenty happening over the next two weeks.

As professional beach bums, we’re especially excited for the Start of Session ‘Beach House’ Party in W1 (we’re still convincing Ophelia to take on the pre-party mechanical surfboard). We’ve dug up all the sandy details for you on p.17.

We’re super psyched for the Festival of Sport in W2 even though our competitive sport of choice may be eating. Rego is closing real soon, so get onto that (sport.arc.unsw.edu.au/festival). Annalise is especially keen for boxercise and learning how to whip those contributors into shape (just kidding, we love you more than burritos). Check out our interview with cricketer Alex Blackwell on p. 8.

**LIKE**

- The new *Jurassic World* trailer. Think it will scare the kids? This will give even the parents nightmares. Oh and Chris Pratt being all Tyrannosaurus-Sexy.
- Gelato Messina has opened their delicious doors at the newly renovated Westfield Miranda; now Shire kids never have to leave.
- Nutri-bullets, Blitz and Go’s, anything that can make me a Nutella shake in less than 10 seconds is worth the money.

**DISLIKE**

- Andy Murray’s foul mouth. Does anybody have some soap?
- Textbook prices. Why is everything not online? It’s 2015, Marty McFly is supposed to arrive this year!
- Justin Bieber for Calvin Klein… it’s like looking at your little brother.

Almost Famous Women by Megan Mathew Bergman

This is a gusty and clever look at the women who were on the cusp of making history, or the other women behind historical figures. There are 13 different points of view presented and paid homage to by Bergman. Most of us have read about Zelda Fitzgerald and Edna St. Vincent Millay, but what about the women just a step away? What about Edna’s sister Nancy or Oscar Wilde’s niece, Dolly? If history with a bit of tongue in cheek is of interest to you, then this book is a must read.

ARE YOU KEEN ON CRICKET? WATCH UNSW TAKE ON USYD IN CRICKET ON 11 MARCH AT 3:30PM AT VILLAGE GREEN
By MICHELLE IVES

As Vice-Captain of the Australian Cricket Team, Captain of the NSW State Team and Club Captain for UNSW’s own UWCC, New South alumni Alex Blackwell can tell us a thing or two about being persistent in your own shot for success…

As with most elite athletes, self-reflection is a huge facet of the game improvement process, and although UNSW alumni and professional cricketer Alex is successful, she knows more than anyone that sport, like university life, is tough.

“I’ve been playing cricket since I was six years old,” she says. “I was actually only 19 when I was picked to play for Australia - I had to ask them where the Australia team was even touring.”

Being so young meant that Alex had to find her feet in the game pretty quickly. Her enrolment in Medicine at UNSW presented the first challenge: leaving in pursuit of a dream, an issue that many students face in their quest for ‘what’s right for me?’

“You go through the heartbreaking lows, but then you win the World Cup.”

Whilst students don’t specifically have that on their to-do list, the same rules certainly apply. And in terms of organisation, Alex’s biggest gem is pretty simple:

“Get back to emails. I don’t have a manager and I report to a lot of people. Write back straightaway.”

Alex’s drive has been palpable since she joined UNSW, with her helping to facilitate women playing first-grade sport through the Universities Women’s Cricket Club (UWCC) back in 2003.

“We started the UWCC to stop the high drop-out rate of women in cricket. We wanted to bolster the number of women playing.

We’re tracking to win The Club Championship this year! I’d love to see more of sporting women in media.”

In terms of going back to study Medicine?

“I don’t know… My passion is to be an Australian cricketer.”

HOW TO OVERCOME
Post-Holiday Depression

By Oli

Well, here we are again at the beginning of a new semester. Time to come to terms with the end of holidays and embrace ‘study’ until we get sick of doing things. Here are my best tips to make that painful transition a little easier:

1. Join Arc and pick up a free student diary

Utilise this ancient book and get organised by marking exams, study sessions, Roundhouse parties and most importantly your next holiday (that’s right we’re already thinking of mid-semester break). Then every time you wake up, get a big red marker and X out the current date. It’ll make you feel like your life is leading up to something climactic. Sign up at www.arc.unsw.edu.au/membership.

2. Caffeine

No more sleeping until midday! You have to wake up early now, especially if you haven’t managed to avoid the disaster that is 9am lectures (rookie error!). Coffee, tea or even breakfast chocolate (yes, it’s a thing) will be there for you through the tough times. Try not to be too enthusiastic about it though. There’s nothing worse than consuming so much that you start speaking full-blown gibberish during your group work presentation.

3. Take a day off

Holidays over? Never! Embrace your denial that summer has ended, free yourself from the shackles of higher education and take a mini holiday during the week. You’ve been working hard(ish), why shouldn’t you dedicate a day to yourself? Spend time at the beach, go out for brunch or sulk in front of your computer at pictures of holidays past.

#SOCIAL STALKER

Twitter: BEYONCE FANFICTION @BEYONCEFANFIC

Are you always thinking: ‘What would Bey do?’ If the answer is yes then this Twitter is for you. Spencer Niemetz runs @BEYONCEFANFIC, tweeting fictional updates of her life away from the stage. Here Queen B’s persona possesses some serious magical powers and proves definitively that Mrs Carter is just like us. Example tweet: ‘Beyoncé’s car won’t start. She flips the hood of her Jaguar and autographs the car’s battery. Her name’s power brings the car back to life.’ #classic.

Instagram: omglitterallydead @omglitterallydead

Meet Skellie. She’s a basic skeleton bitch who does what basic bitches do best: She loves Starbucks, Netflix, as well as taking the occasional work/bed/#ootd selfie. Her totes amaze snaps are photographed by Dana Herlihey, and this talented lass started @omglitterallydead when she took a photo of the plastic skeleton in her office, holding a cup of desperately needed Starbucks. It snowballed from there. Sidenote: It’s not #tru unless you ‘grammed it.

Tumblr: MUSEUM OF SELFIES

For Olivia Muus, taking a photo of her friend’s hand in front of a painting while visiting an art gallery, led to this Tumblr blog. Scroll through and see figures in classical works of art posing for a selfie like no f*cks are given. The Danish art director encourages everyone to ‘gram their on selfie with #museumofselfies. Just make sure the museums are a-ok with it and don’t forget to turn off your camera flash.
Arc’s Festival of Sport is here! We’ve raided the ultimate student’s sports bag and found the best accessories to equip you for all the fun free sporting activities on campus in W2. Sweating has never looked so good.

What’s better for your career, work experience or extracurricular activities?

**BLITZ DEBATES**

**WORK EXPERIENCE**

SAYS KEVIN NGUYEN

The most overlooked reason to do work experience is to see if an industry is right for you. On average people make three major career changes in their lifetime. That number will go up when modern medicine invariably finds a way to double our life expectancy.

There is no industry without its pitfall. Even if you love the work, there are a lot of reasons you might not make a career of it: long gruelling hours, pressure of deadlines, an emphasis on quantity over quality, general lack of nudity, a low pay ceiling, etc. I spent over four years becoming a qualified psychologist, and nope right out of there by the third month in the field.

Get some work experience and then get to know your industry. Because chances are you made an impulsive decision about your degree when you finished high school and you’ll end up hating your life.

**EXTRACURRICULAR ACTIVITIES**

SAYS ANNALISE BOLT

Slave away in unpaid menial work? Or do something you love with friends?

Extracurricular activities will not only make your years as a student more enjoyable, they’ll also improve your chances of a job upon graduation by setting you apart from the pack. Who would you remember more? The graduate who spent a few weeks in an office (most likely photocopying and getting coffee) or the graduate who captained a dodge ball team to the national finals. They show that you’re an enthusiastic person and say something about your unique interests. Professional advantage aside, you will without a doubt have more fun at uni if you get involved with volunteering, a club/society, a sport or a performance. In the long run you’ll value those friends you made in the Exotic Beer Society far more than those acquaintances from a brief stint of work experience. Don’t get me wrong, work experience is still important, but extracurricular activities can be fun and professionally enriching.

**Philips Wake-Up Light, $130**
Waking up for class has never been easier! No more dreaded mornings dragging yourself out of bed. This pillow shaped light slowly illuminates at your set wake-up time, while also playing soothing wake-up melodies, the radio, or even your own favourite tunes. It also comes with a convenient iPhone/iPod charge dock. You can even drift off to sleep easier with a gradually dimming light in night mode.

**Selfy Case With Remote Camera Remote, $55**
Cringe worthy selfies are now a thing of the past! Well probably not, but the “Selfy” case from iLuv Creative Technology will now turn your iPhone 5 into a wireless camera with remote control allowing you to capture all of your precious University memories with ease. It also acts as a durable protective case, connects via Bluetooth so it doesn’t need any additional apps and can even be used for videos. The case comes in black and pink.

**Microsoft Surface Pro 3, starting at $999**
This year’s hottest gadget has to be the Surface Pro 3. Dubbed the “Macbook killer” by Microsoft, it acts as a tablet/laptop combo with a detachable keyboard. Equipped with an impressive Intel i7 Processor, 8GB RAM, front/rear 5MP HD cameras, kickstand, surface pen, and with up to nine hours battery life. This baby will have all your classmates jealous while you use it to browse Facebook.

**Devotec Fuel Micro Phone Charger, $35**
Sick of spending all day on your phone in class just to have the battery die? Well, problem solved! The Devotec Fuel Micro Charger is the world’s smallest mobile phone charger, designed to give you about 20-30 minutes extra talk time, or a few more hours on standby. Sizing up at about half an inch, you can easily add it to your car keys, put it in your pencil case or even hang it off your phone.

**We’re Now the Eggmen**
Scientists at UC Irvine have recently discovered how to unboil an egg. By adding urea to solid egg whites, it breaks down the proteins before untangling them in a vortex fluid device, so that they go back to how they were before. Why bother in the first place? It’s a lot quicker than previous processes and can actually cut costs on creating therapeutic antibodies!

**The Future is Now!**
Scientists in Singapore have recently created a skin patch that can power small electronics via static electricity! When attached to the forearm, it can generate 7.3V from simply clenching your fist. It’s possible that this could be used to charge small devices like watches, instead of relying on batteries.

**Poo + Cold = Curing Infections!**
Currently, the cure for a C. difficile (a common bacterial infection in the digestive tract) is to insert faeces into the gut - the bacteria itself is actually resistant to antibiotics. Traditionally, this means inserting the faecal matter via a colonoscopy, but recently it’s been discovered that by freezing the faeces, it’ll thaw out in the small intestine. Yeah, as gross as it sounds, it’s better than having a tube up your arse.

**Start of Session ‘Beach House’ Party**

Was your summer spent swapping between the beach and the bar?

Well the Roundhouse has brought the beach INTO the bar for one massive party to kick off the semester.

Dust the sand off your bucket hat and borrow your dad’s favourite Hawaiian shirt because when sunglasses are worn at night you know shit’s going down. The Roundhouse has replaced the sweltering Australian sun with some serious heat on the dance floor.

The headliner, DJ Zannon, is guaranteed to get you grooving like you have too much sand in your swimmers (yes, that’s a good thing). Bring your moves to the mechanical surfboard (kowabunga) because everyone knows there’s nothing hotter than someone who can ride umm … waves.

There will be buckets of ice-cold bevvies and oceans of mates to keep you company. We’re shore you won’t sea another party like this.

Find out more about DJ Zannon on p.25 and check out our video with him on blitz.arc.unsw.edu.au

Visit unswroundhouse.com and facebook.com/unswroundhouse for more info.

**The Festival of Sport**

Serious sports lovers will be spoilt for choice with a range of sweat inducing activities over three days. Play with mates in a social competition of futsal, touch, volleyball, basketball or football. Try your hand at a new sport with Power of Hour workouts in TRX, gridiron and taekwondo among others.

Never fear if eating is your sport of choice, the festival has got you covered too with free BBQs every day. You can also revisit a classic movie, *Cool Running* at The White House on Tuesday night with free snow cones (oh yeahhh).

On Wednesday night age old rivals go head to head in the form of UNSW v. USYD cricket match on the Village Green. Ease the tension with a beer from the Roundhouse pop up bar.

Then come Thursday, channel your inner gladiator (or Wipeout contestant?) and take on The Beast giant inflatable obstacle course will be waiting for you on the Village Green. If you survive, you might just win a Go Pro.

And if all that doesn’t persuade you, just think of all the athletic boys/girls in gym clothes that will be roaming around campus for your perving pleasure.

Let’s get physical! Physical!

Blitz caught up with the Beach House Start of Session Party headliner, mash-up maestro DJ Zannon.

Having already showcased his moves on an impromptu dance floor in the Quad, he now plans to go one step further with a packed-out floor at the Roundhouse on March 5.

“There will be a whole bunch of mash-ups, a whole bunch of bounce. Whatever you guys want, just put your hand up and I’ll do it,” Zannon said. (Ed. As long as you’re not taking 1D requests.)

Originally a hip-hop dancer, Zannon has always found himself surrounded by music.

“I grew up with just music,” he said.

“My parents never used to put the TV on much so music was a general thing. One day at school we all started playing around with music and Djing became a small thing that I would do.”

After spending much of 2014 on the road, including a mini-tour of the US with shows in Miami, Sacramento and Los Angeles, he hopes for more of the same in the new year.

“We’re going to keep doing tours and big shows like this. We’re looking forward to a massive 2015,” he said.

Working closely with DJ Zannon is bounce-movement agency Lucky Entertainment, who shot to fame alongside dance music giants Will Sparks, Joel Fletcher and Tigerlily.

“I’ve got an EP in the works. I’m working with a lot of big guys... There’s a lot of music coming out, I’m just trying to branch off and keep the ball rolling.” (Ed. Remember us when you’re touring with Calvin Harris.)

If you’re thinking about sticking to the walls when Zannon is plying his trade, you have another thing coming.

Zannon is no fan of a tame night out. When he gets going on stage, it can be just as much of a party behind the decks as it is on the floor.

“There’s a lot of things that I’ve done wrong,” he said with a playful grin.

One memorable moment of craziness came when Zannon started spraying champagne into the crowd, only to drop the bottle into the front row (sounds like a good night for whoever caught it)!

Nevertheless, he promises that UNSW students can expect to cop a spray.

“Definitely... without the bottle-into-the-crowd situation! I’m hoping to stage-dive without anyone dropping me,” he laughed. (Ed. The bottle in the crowd is fine by us, send it our way.)

Having partied his way across America, Zannon is ready to see his home crowd raise the bar when it comes to having a good time.

“Americans like to party, but I think we can party if we want to,” he said.

Catch waves of awesome tunes from DJ Zannon and other stellar DJ’s at the Beach House Start of Session Party at the Roundhouse on 5 March.

Tell us about your choice of medium and why?
I work in pencil or charcoal to create portraits and am also a keen emerging writer who pounds away on my Macbook. I love the flexibility of charcoal. You can make big, swooping actions to create something expressionistic or impressionistic. You can also work on something fine like smooth skin texture. As for pencil, well, I believe pencil is the foundation of every visual artist and it’s nice to go into details with a sharp point.

Your favourite tools of the trade?
The Mars Lumograph series is my favourite. Their 8B is my favourite pencil. I also could never survive without my putty (mouldable) eraser! I’m also on the lookout for Arches’ hot press paper.

What’ve you been drawing lately?
I’ve been drawing portraits for friends. Pretty people and pets. That’s not the most conceptually stimulating art to do, is it? But it’s a way of getting into commissions and working on technique. I normally draw very morbid things though, and I’m also planning on doing fashion illustration.

The most challenging work you’ve done so far?
Well, a couple of years ago in high school I did a stop motion charcoal animation film. I had to erase, redraw, and shade each drawing… Then I had to use Premiere Pro to combine the images together, there were more than 1000 images, and it just wouldn’t stop crashing.

Why do you prefer to work in black and white?
There’s a minimalist feel to black and white. It’s a classic and it unclutters a coloured photograph so that you focus on what matters. It is minimalist in that sense, but conveys maximum emotion. That, and good coloured pencils cost a lot hah.

What inspires your work?
Other artists inspire me, even artists who don’t work in the same medium. Great art does! For drawing, Kathe Kollwitz, Edvard Munch, Alexander McQueen’s designs, and lately I am interested in commercial portraiture by Kei Meguro. Film noir and evocative, high contrast photography also inspire me. For writing, I am inspired by the likes of Nabokov, Woolf, and the maestro – James Joyce. I have a habit of listening to epic, cinematic music while I work too.

Last question – can you draw me/ my mum/all of us something?
Haha, well, I’m on the lookout for a variety of subjects to draw this year. Shout out a subject and if I like it, who knows, I might draw it and post it up!

To see more of Joyce’s work you can visit: www.thingsbyjoyce.wordpress.com
Where are you studying now?
I'm currently studying at Erasmus University, Rotterdam, the Netherlands.

What are the three weirdest things you've seen since being abroad?
1. The “coffee shops,” which - for those of you who don’t know - is the name for marijuana outlets. Even though I knew about them before visiting the Netherlands, I still can’t wrap my head around how openly acknowledged weed is here.
2. I saw a girl in a club vomit onto someone else’s bag, then without anyone batting an eyelid, she got up and went back onto the dance floor. Party on Rotterdam.
3. “Santa Claus” is the name for a statue which has been nicknamed the Butt Plug Gnome. For obvious reasons - Google it.

What are three things you have to see while in Rotterdam?
1. The architecture and street art: In WWII, most of Rotterdam central was bombed flat. This means that the majority of buildings that exist in Rotterdam today are post-war, and has led to incredible architectural advances. My favourite building, which was only completed last year, is the Markthal, which houses permanent fresh produce markets.
2. The clubs: Rotterdam has arguably some of the best nightlife in the Netherlands, particularly for students. Every night of the week there is somewhere to go, whether you like techno, deep house, RnB, pop music, etc.
3. Amsterdam: It might sound silly, but Rotterdam is less than a 40 minute train ride from Amsterdam, which means you can’t come here without visiting the Netherlands’ largest city.

What’s the biggest difference between studying at home and studying abroad?
Living in student housing has been the biggest change for me! For so many reasons, both good and bad. Sharing a kitchen with 10 people is very interesting, annoying at times but definitely worth it for the fun. Living alongside like-minded people creates an amazing atmosphere - and the parties are incredible. Not only that, but the distance to class is so fast that I can ride my bike to class within 15 minutes (a big change from the one hour commute I was used to at home).

What are the three biggest differences in your daily routine?
1. Not working! I was working four days a week before coming on exchange to save enough money to be here and now it is the strangest sensation to have so much free time. I’m loving it!
2. The amount of clothes I have to put on every morning! I’ve been wearing thermal tights under my jeans every day and since some of my Dutch flat mates found out, they haven’t let me forget about it.
3. Organising trips during my uni week for every weekend. Amsterdam, Antwerp and the border of Germany: All within two hours travel. Get going!

What’s the best thing about exchange?
Meeting people from incredibly diverse backgrounds. The people I share my kitchen with alone are from Argentina, Ecuador, Ethiopia, St. Maarten, Belgium, Turkey and the Netherlands, just to mention a few of them. If you’re open to it, you’re able to learn a lot from every person you meet. Oh - and Stroopwafels!

What do you wish you had known before going on exchange?
Luckily, UNSW and your host university bombard you with enough information to know the procedure for all the boring formal things (such as a residence permit, registering your address, etc). But there are a few small things: Bring enough Vegemite! I do have an addiction. Also, bring an Australian power board - It means you don’t have to continuously swap what is plugged in to your adaptor once you’ve settled in (it was also incredibly useful when a few of us stayed in an eight bed dorm in Prague, where for some reason there were only two powerpoints).

What were the highlights of your trip?
The whole trip was filled with highlights from the first moment to the last. The buzz of being thrown into the bustling streets of New Delhi, a memorable overnight train ride into Rajasthan, the unexpected delights around every street corner, the incomparable food, the sightseeing of ancient wonders and, most importantly, the unforgettable characters we came across on our trip! It was incredible to experience the inner workings of an NGO and the people that make it all happen. Their work ethic was inspiring.

What were your expectations of GV?
I was seeking a completely new experience slightly out of my comfort zone. It seemed like an incredible opportunity to combine volunteering for a great cause and exploring a new culture. It can’t get much better than that! All of the previous participants would have the most amazing anecdotes to share about their trips, so it was evident that wherever I went to volunteer would be an epic adventure. It was reassuring to talk to participants from previous years and know that there are passionate people ready to support you through this process. The Global Village community is incredible!

What skills did you develop on the trip?
Before I went on the trip I had very basic skills like first aid. It was a big help to have some capacity (albeit not a whole lot) to speak the language of the country we were going to. But in all honesty, it was more important to bring an open mind and the patience to get through the many challenges this experience can bring. I developed far greater skills than I brought to the table including working with children, communicating effectively amongst a large team of international volunteers and surveying and data collection. There are plenty more that come with living with a group of people for an extended period of time!

Regardless of where you go, you can be assured that the Global Village experience offers more than you can imagine. I definitely wouldn’t mind doing it all over again!

### FILM

**The Imitation Game**

Directed by Morten Tylden

From a screenwriter who had never had a feature film produced and a director who had never made one in English, comes *The Imitation Game*, the story of the enigmatic Alan Turing and the breaking of the ‘unbreakable’ Enigma code. It could have been one of those over-clichéd, underachieving biopics, but instead, it’s a beautiful and suspenseful drama that reveals pieces of its puzzle slowly but surely, until the final, heartbreaking picture can be seen.

Benedict Cumberbatch and his stiff upper lip are as talented as they are titillating, doing justice to troubled genius Turing. Keira Knightley finally steps out from the shadow of Elizabeth Swan and earns an Oscar nomination, despite the fact that it took her more than five days to finish the crossword that her character finished in under five minutes. The snap-crackle-pop of Cumberbatch and Knightley’s platonic yet affectionate onscreen partnership (formed offscreen during their secret, illicit cigarette breaks) is what keeps the film rich with pathos and humanity.

It may be called *The Imitation Game*, but this film is the real deal.

### BOOK

**The Hundred Year Old Man Who Climbed Out The Window and Disappeared**

*Jonas Jonasson*

*The Hundred Year Old Man Who Climbed Out the Window and Disappeared*, by Jonas Jonasson, may have a rather complicated title, but it is not a complicated novel. The story follows Allan Karlsson, who is – you guessed it – a 100-year-old man who escapes from his centennial birthday party via a window.

We then follow his story as he finds himself involved with thieves, incompetent police, a suitcase filled with cash and a series of murders, some of which are more accidental than others. We learn that Karlsson had spent his earlier life involved with some of the 20th century’s most significant people and important events – everything from the creation of the atom bomb, to having dinner with Stalin himself.

I’ve heard many novels and films described as “charming” but never strictly understood the meaning. Jonasson’s debut novel, however, can only be described as such. With an endless stream of witty dialogue, it’s an engaging story that keeps you entertained from cover to cover. There are moments where it gets so funny you may find yourself laughing enough to make an elderly woman come and ask if you are okay (I may or may not be speaking from experience).

It’s a novel you won’t regret reading.

### ALBUM

**American Beauty / American Psycho**

*Fall Out Boy*

*American Beauty/ American Psycho* is Fall Out Boy’s seventh studio album. This album sees Fall Out Boy (FOB) since separations, solo albums and Ashlee Simpson in what I believe is their best form yet.

They are contemporary and dynamic, yet still own their quirky Pete Wentz penned lyrics that fans expect. Arena sized drum rolls, synthesised overtones and guitar strums make up a majority of the tracks along with Patrick Stump’s delicious vocals which deliver traditional FOB to their fans.

This album presents FOB as one of the only mainstream rock quartets to continuously nail music that rewards listeners’ ears. It’s a shame, though, that most song titles are just one word.

Long gone are the days of the band naming songs after quippy pop culture references but, then again, all those scene and emo kids who got those quips grew up too and now work in finance.

*American Beauty/ American Psycho* is the FOB album most fans have been waiting for and it certainly delivers if you have been loyal. Give a particular listen to *Centuries*, *Fourth of July* and *Irresistible* as these tracks definitely were the stand outtracks for me.

Saving Room for Cats

Men Taking Up Too Much Space On The Train and the wonderfully titled Your Balls Are Not That Big, show that man-spellers are a GLOBAL issue. In both photo essays, men are painted as complete arseholes for taking up so much space on the train #ugh. But why do said arseholes open their wide-as legs on the train or bus, when other poor commuters have to stand? Well, there’s a Tumblr that offers one valid reason: They are saving room for cats!

Visit savingroomforcats.tumblr.com. A conga line of photos show that, yes, men (and some women) are too busy being glued to their phones/taking v important naps/thinking about lyf. But, they still spread their legs so that they could make room for these furry friends.

How considerate of them!

They even accept submissions, so the next time you hop on a bus or train, and identify a man-spreader, take a photo of ‘em on the sly and send your snaps to Saving Room For Cats. Why? Because as BuzzFeed said: ‘Cats need subway [and bus] seats, too, after all’.

Top Eleven Football Manager

Available on the App Store and Google Play

Top Eleven is a soccer manager game where you start off with your own team, a budget, and endless possibilities. Although you can’t watch miniature digitised guys prancing around a soccer field, you control everything from their training to their #skillz, positioning and even the aggression of a match. You also get to buy, sell and sack them, build up your stadium and send your guys to the psychiatrist when they need it.

Whether you are an Apple aficionado or Android to the bone, Top Eleven doesn’t mind – It’s compatible either way. Real-time games see you and your customised team in their customised jerseys play other very real players from all over the globe. You can make new friends, swap gifts, play friendlies and even support teams via the simple tap of your fingers.

Arguably the best aspect of this game is that it is free to play and free to win. Sure, extra cash buys you some pretty cool features, but with the new update there is nothing that you can’t get from watching the right amount of promo videos. So go ahead and download it, and soon you’ll be ringing up the Socceroos for job opportunities.

The Magic Flute

Opera Australia

The story of The Magic Flute is a classic quest, as a handsome prince must overcome a series of trials to earn the affections of his virginal love interest. There’s a sagacious wizard, an evil witch, and a cowardly, yet ultimately heroic, fool who tags along. But the joy of opera has never really rested in the plot. Rather, it is the staging and the music and the energy and exuberance of it all that truly envelops you. As this is a Mozart opera – flamboyant, daring, and often salacious – you can be guaranteed great value on both those fronts.

Opera Australia has envisioned this as their ‘summer blockbuster’. Almost every aspect of the production is designed to be accessible and family-friendly. The libretto has been translated from German to English, and the mise en scène is a colourful combination of Jim Henson puppetry, Freemason iconography, and 1970’s Doctor Who. It’s opera for the unwashed masses, but really that’s how Mozart intended it to be. Purists might mourn the loss of the original German, but to my ears it all sounds just as majestic in English.

Also, does Der Hölle Rache (trust me, you all know it) sound frickin’ awesome or what?

BY SAMUEL INGLIS
Mana Ohori of Thoughtful Foods shares their favourite summer recipe with Blitz.

**Ingredients**
- 2 tbsp olive oil
- 1 brown onion, diced
- 2-3 dried bay leaves
- ½ bunch celery, diced finely
- ½ cup of white wine (or water)
- 1 cup brown lentils, drained (either 2 cans or cooked dried lentils)
- 1 cup bread crumbs
- 2 tsp dried rosemary
- 1 tsp dried oregano
- 1 tsp stock powder
- Salt and black pepper, to taste

**Dressing**
- 1 tbsp apple cider vinegar
- 1 tbsp honey or agave
- 1 tbsp sunflower or linseed oil

**Directions**
1. Combine all the salad ingredients in a large serving bowl and toss.
2. In a small bowl combine the dressing ingredients.
3. Pour dressing over the salad and toss. Refrigerate and serve chilled.

*Any tips for overcoming the despair of post-holiday depression?*
I would recommend planning your weekends in advance so you make sure you do something. Do all your work in the week so you can spend the weekends however you want like it’s a holiday.

*What’s the weirdest sport you’ve ever heard of?*
Bunny jumping in Sweden or truck pulling in Germany which are off Hamish and Andy.

*Who’s your favourite athlete?*
Roger Federer, tennis legend.

Mechanical Engineering

*How did you spend your summer?*
Camping and just relaxing. I used to live in Wollongong so just camping down around there.

*Any tips for overcoming post-holiday depression?*
Keep the holiday going, never end it.

*Favourite sports movie?*
The only one I know is *Bend It Like Beckham* so I’m going to go with that.

*Any tips for overcoming the despair of post-holiday depression?*
Do the things you did on holiday again. Speak to the same people. If you went out a lot or went to the beach a lot, still do it.

*What’s your new semester resolution?*
For me it’s an exchange semester, so I have a lot of resolutions. Make new friends, get good grades and just enjoy it here.

*Any tips for overcoming the despair of post-holiday depression?*
I’m actually waiting for uni to go back because I’m so bored of doing nothing. Just get involved with everything that you can, meet a bunch of people.

*What’s the weirdest sport you’ve ever heard of?*
Well I play Quidditch. I’m a beater. It’s pretty competitive, we just came second at our national tournament last year. We train two to three times a week and compete in tournaments monthly.

Electrical Engineering

*How did you spend your summer?*
I was mainly training in weightlifting. I used to do taekwondo as a sport. I got really good at it and represented Australia, was Oceania Champion, but I got a bit sick of the sport so I’ll see how far I go in weight lifting.

*What’s the weirdest sport you’ve ever heard of?*
I don’t know, is Quidditch a sport?

*Who’s your favourite athlete?*
Mike Tyson. He was undefeatable, just crazy.

Medicine

*How did you spend your summer?*
Working and getting pissed or both at the same time… but you can’t put that in the magazine, can you?

*Any tips for overcoming the despair of post-holiday depression?*
Try to find something that takes your mind off it. Join a club, go to the pub, see a few people, say hello when you can. Talk to bus drivers as well, they’ve got a lot of wisdom.
