Hi there,

To hide the fact that the most physical activity we take part in is getting sweaty conquering Basser Steps, we’ve created an entire issue around sport. Not only is it Unigames over the mid sem break (dust off your runners and line your stomachs, people) but it’s also a good time of the semester to remember to stay active. Trust us, it will make that last haul of assignments more manageable.

And of course, we strongly recommend de-stressing the gold old fashioned way with an abundance of snacks. Stress Less Week has got you covered with all the free food (and fun activities) you could dream of through W10.

If you’re craving some more Blitz goodness be sure to head to blitz.arc.unsw.edu.au and facebook.com/blitzmag for your fix.

Hey UNSW,

By the time you’re reading this we will be very close to the SRC and PGC elections. While you might not know it, the SRC and PGC are responsible for a wide variety of changes that make your time at university better or just that little bit easier.

This year your student representatives have worked with UNSW to provide a dedicated 24 hour study space in the library, enhanced the amount of funding dedicated to the roundhouse refurbishment by $10+ million dollars, and negotiated such that the uni will no longer introduce a “Marginal Pass” grade for marks between 50 and 55 - among many other achievements. Whilst it is not always overtly obvious, these changes do have a marked effect on your university life.

I would strongly encourage you to engage with the election process this year, and share your experiences with all candidates about how you think we can make UNSW a better place to be.

First They Killed My Father
by Loung Ung

Following the memoir of a young girl, this book tells a story of survival under the Khmer Rouge regime in Cambodia. The girl and her family attempt to hide their education and city-dweller status in order to survive under the nose of a brutal regime. One cannot comprehend the horror of life for her family who endured starvation, violence and forced labour. There was no escape from this gruesome reality for millions of people in Cambodia whose stories may never be told.

Forget about the Rugby World Cup... there’s a new sport taking the world by storm. Blitz’s Lyndon Christie pulled out his snorkel and trained with the UNSW Underwater Rugby Team. Not only are they masters of the weirdest sport on campus but eight of their players have just competed for Australia in the World Championships in Colombia.

Never before had I played a sport where it was compulsory to wear a snorkel, made me feel like a mermaid as majestic as Ariel, and involved wrestling... until I trained with the UNSW Underwater Rugby Team and felt a bit like a fish out of water.

Underwater Rugby is a unique fusion of sports. It’s kind of like if water polo and rugby came together and had a baby, and decided that the best way to raise the child was to plunge it into the ocean.

‘At first I thought it was a joke,’ said player Sebastian Riorden. ‘But I got into the pool about three weeks into uni and loved it.’

Teams consist of 12 players in total, six compete in the water while the other six act as reserves. Two underwater goals sit at either end of the pool and the main objective is to get the ball into the other team’s goal. Simple? No. Because did I mention the entire game is played underwater?

‘You feel wonderfully weightless, like you are freewheeling through outer space,’ said player Celine Steinfeld. ‘As it is played in a pool that is up to 5m deep there are challenges. We have to adjust to the lack of oxygen and learn new ways of communicating through water.’

Teams can pass the ball to one another in all directions as they make their way upstream (kind of like salmon) to the all important goal basket. And just for good measure I should mention that the game is a contact sport just as rough and tough as rugby, so opponents will attempt to tackle, drag, pull and smother you as they swoop to take the ball.

Once in the water it’s clear to see that a big part of this game is the ability to stay calm and hold your breath underwater. As the game played on, I realise that most players are able to stay underwater for up to a minute, swooping and gliding amongst each other. The play is as fast paced as a flurry of speedos weaving in and out, up and down in the vast pool of water.

Now I should probably add that I personally have a harrowing fear of drowning. The thought of being helplessly stranded under water is enough to give me night sweats. I may or may not still need my floaties when I swim at Coogee.

Yet here I was totally submerged in the UNSW pool, fighting off shark-like humans as I attempt to score in this game.

Lucky for me I was in safe fins with the UNSW Underwater Rugby Team. Not only were they the first club in Australia but have also begun to make waves among the worldwide Underwater Rugby community. Eight players from the club recently represented Australia at the 10th CMAS Underwater Rugby Championships in Cali, Colombia.

‘We were tremendously excited to compete with, and learn from, the world’s best players,’ said Celine. ‘The championships were a huge success.’

It’s pretty clear the team know their stuff and they are super keen to get more sea dwelling humans/non-humans involved. If there are any aquatic mammals currently studying at UNSW I highly recommend you join the squad.

Blitz writer and Roosters fan, Yael Brender, crossed to the dark side to interview Manly Sea Eagles player and UNSW alumni Tom Symonds.

What did you get out of your time at UNSW?
I started at UNSW straight out of high school, and it was a great place to start because there were great parties. But, not long after I started, my footy career got intense and I had to go part time after two years, so the social events died down (bummer)! But my whole experience at UNSW was really good, even though it took almost seven years to get my degree in Exercise Physiology.

Do you still have friends you made here?
Yes! My uni mates and I catch up for a beer every now and then. One of the guys I met here is Waringa Rats fullback Dave Feltsheer – he’s a bit of a local hero. We reminisce about how we partied together, and how they showed me the ropes in my first year. I have great memories of one of my first pub crawls, where everyone was wearing each other’s clothes by the end.

How did it feel to make it onto a professional rugby team?
I started getting paid at age 18, and went full time first grade at age 20 with the Sydney Roosters. Four years later I went to Manly, where I still play. It feels so cool and I’m so lucky to get paid for doing what I love doing. Playing my first grade debut, I was super nervous but also kind of proud – it felt like kind of a big deal. Nowadays it’s just another day at the office but in the greatest possible way. I get to hang out with twenty of my best mates every single day. It’s a big squad and everyone is pretty tight.

What’s your training program like? Are you on a strict diet?
In a typical training week there’s not many days off. We train everyday with weights and field sessions. We do video work to study up on how the team is going and who you’re going to play and how to beat them. I’ve always tried to eat well but it’s not always easy. I’ve been on the paleo diet for a few years (except with beer). I always have junk food after the game – my favourite is the Oporto Triple Bondi Burger.

What do you want to do once you’ve retired from professional rugby?
I’d definitely like to do something to do with Exercise Physiology. I’m on a good pathway to injury rehab, and that way I’d get to stay around the game. As long as it supports healthy living and having fun I’ll be happy.

What advice would you give to students hoping to make it as a professional athlete?
The best advice I can give you is to be dedicated to your sport but make sure you enjoy it as well. These days it can be tough but there are a lot of pathways towards being a professional athlete. There can be a lot of setbacks, but the best thing I can tell you is to remain patient and persistent and really stick at it.

Aussie race walker and UNSW alumni, Jane Saville, was 100m from gold at the Sydney Olympics when she was disqualified. Blitz’s Serena Dong chatted to her about everything from Olympic medals to Kel’s butt wiggle.

Why did you decide to become a race walker?
I did lots of sports when I was young and I didn’t decide until the end of uni I wanted to be a race walker and still swam a little bit but focused everything on race walking. I think that helped me in the longevity of my career.

What did you learn from your time at UNSW?
Time management. I studied social science and economics. Once I got to uni I applied for a Ben Lexcen (Sports Scholarship) and financially that helped pay for a lot of uni or some of my trips within Australia for athletics.

What’s on your mind as you walk all those kilometres?
Obviously you’re thinking of technique but also what’s going on around you and the tactics of the race. Back then you had your watch and your heart rate monitor and I knew where the markings were for the kilometres but now everyone has got Garmins and things like that so yeah… I’m starting to feel really old now when I talk about back then.

What’s your biggest fear going into any race?
[Thinking] I wouldn’t perform as I hoped, especially after 2000 when I got disqualified at the Olympics. That dinted my confidence quite a lot. In 2001 I was disqualified two more times and one at the world championships so that was a bit of a changing point in my career when I really thought: do I really want to do this? Is it worth training so hard [when] I could go and get a job and be normal and make money as well? But then I also thought I didn’t want to have any regrets and that was one thing that kept driving me through my career.

Back in 2000, at the Sydney Olympics 20km walk, you were disqualified 100m from the finish line. You were so close to that gold medal. How did you feel at that moment?
I was winning and to be disqualified was devastating because it was my biggest dream in front of my home crowd. [It was] my biggest nightmare and everyone was staring at me, cameras down my face within a minute of being disqualified. I think I was a little bit naïve handling the media. I said that I wanted a gun to shoot myself and it was pretty silly. Half an hour later I was thinking it’s only sport. I was pretty frustrated but you know that’s sport.

To be honest, there are highs and lows of sport and looking back on my career I think if I would have won then maybe I would have retired because you can’t really get any better than the Olympics. Maybe I wouldn’t have won two more gold medals at the Commonwealth Games. I wouldn’t have had the experience of competing in Athens. I had so many amazing experiences after that. It gave me great courage and confidence not just in my career but as a person. It would have changed my world being disqualified but it made me a stronger person if you think in the long run.

What advice would you give UNSW students in general who were so close to success but in the end could not reach it?
Well I think it’s not just all about winning, it’s about your personal development as well. So I think having some perspective is really important as well as looking at the big picture, which I’ve had to learn to do.

Did you ever participate in Uni Games?
Yeah I did! I did athletics and swimming. I think my first one was in Brisbane in 93’ and I think 94’ would have been Wollongong and 95’ was Darwin. I had a really great time.

What do you think of Kel from Kath and Kim’s race walking technique?
[Laughs] I’ve got it on DVD and it’s hilarious! I love Kel! He does the bottom wiggle quite well.

‘YES’ SAYS CATHERINE MACAROUNAS

There are a lot of things on my Facebook feed that I don’t really care about – click bait, play by play sports commentary and thinly veiled and passive aggressive rants, to name a few. However, if a friend of mine has done something awesome, I want to know about it.

Maybe we like to live vicariously through other peoples’ lives, or maybe we are just inherently nosey, but not only is it ok to post about your personal achievements online, people WANT to read about your achievements.

Have I ever posted about my personal achievements? Hell. Yes. There have been times in my life where I did something I was proud of and wanted to share it with a big group of people. I’ve always received supportive responses too, which shows how sharing your achievements with others can be a really positive experience.

Of course there are boundaries. It’s a thin line between inspiring a ‘like’ sharing your excitement, and causing such annoyance that your post gets screen shot and spread around at your expense. Whilst I’d be excited to read about how you got a new job, baked a cheesecake from scratch or ran the City2Surf, no one wants to see you rub in the HD you got on your last assignment.

Overall, it is completely fine to share personal achievements on Facebook. I want to see what cool things you’ve been up to – I’ll probably throw you a like too!

‘NO’ SAYS CHARLOTTE GOODSIR

I am writing this today as a hypocrite because I am the first person to post my ‘achievements’ online, and yes sometimes they are just getting out of bed. But today I am coming at you from the point of view of everyone else.

Seriously, no one cares if you’ve had brunch with your super attractive gal pals at a waterfront restaurant eating organic and sustainably farmed smoked salmon on a bed of lettuce farmed by children in Africa who have been adopted by Brangelina’s school for the gifted and talented #nofilter #bestfriends #hotgirls #sun #sky #sydney.

But I’m still going to like your photo. Because I am all about being a supportive friend while I’m procrastinating, trying to understand how you can do this with a million and one essays to write.

I think everyone deep down knows that no one has the life they say they have on Instagram or Facebook. So why are we lying to ourselves? Why are we constantly updating the lie that we are living the life of a celebrity when really we are all just sleep deprived uni students on the lookout for the next free food stall? As Alexa Chung once said: ‘No one is as happy as they seem on Instagram.’

Posting your achievements on Facebook is ok, but only if you’ve got your priorities right. Getting a new job= ok. Not being that hung over after getting more than tipsy last night: not ok.

Is it ok to post about personal achievements on social media?

HOW TO...
NOT SWEAT THE SMALL STUFF
WRITTEN & ILLUSTRATED BY CHARLOTTE GOODSIR

With the craziness of mid sem exams take time to think about what really matters, aka your health and wellbeing.

Plan and prepare
Organisation is key. By seeing everything you have due on a calendar it allows you to plan easily, and not have a night-before freak out.

Listen to music
Listening to your favourite music and belting it out is proven to reduce stress, so whether it’s 1D or Whitney, a bit of Iggy or Bruno turn up the stereo and forget about everything that’s due – it’s only three minutes of your day.

Buy a fluffy animal
Alive or not, it doesn’t matter. Seriously, have you seen them. So cute. Much cute. More cute than this essay. CUDDLE TIME.

Do hot yoga
Here you will not sweat the small stuff. You will sweat litres and litres of water that you didn’t even know your body had. Seriously your eyeballs will be sweating.

Malaysia Festival

Ever wondered why your Malaysian friends use the word 'lah' at the end of every sentence? Keen on seeing Malay, Chinese and Indian wedding traditions? Wonder what Teh Tarik and Nasi Lemak is? Well you don’t have to travel 4112 miles to find out.

This year’s Malaysia Festival (MFest) is to become its best one yet as it celebrates its Silver Jubilee. Expect bigger, better and bolder than ever before, as this year is sure to make an impact in Sydney’s cultural hub.

Come and be serenaded by the sweet tunes of one of Malaysia’s rock legends, Amy Search, while you check out the many cultural activities. Rock a cool tattoo at the Henna painting booth that uses traditional Indian temporary and natural ink. And of course, there will be food. No festival is complete without some scrumptious food in hand for that ultimate Instagram post. Malaysia prides itself on its local cuisine that is rich and complex in flavor. There will be around 20 stalls to sample the goodness.

Come along and be a part of Sydney’s largest Malaysian cultural event. Last year the event attracted around 30,000 people so it’s sure to be a big one.

BY JANELLE TAI
What instrument did you start out with before you moved into being a percussionist? I started out on piano up until my HSC. I’ve been learning percussion since I was 9 but only after my HSC did it take on much more significance. I also played bass clarinet in my high school concert band because they needed one so why not?

How do you stay focused and organised with all your music and instruments as a percussionist? I guess you just learn to juggle lots of things at once and multitask. Classical orchestra music isn’t too bad in terms of running around, most of the time you stay on the one instrument, but modern orchestra and wind band (and brass band) pieces can get quite complicated. It’s just another skill you pick up, being able to plan ahead, while playing, to what you’ll have to do in a few bars.

What’s your most memorable experience? Probably the concertos I’ve done. There’s something about standing in front of a full orchestra, being really exposed and in control of the piece, that makes for a very intense experience.

What secret talents do you have? I have perfect pitch. It’s been extremely useful to me in my musical career. I also really love writing music. I’m kind of boring non-musical-talent-wise though, I don’t really leave myself enough time to get good at anything else.

STUART RYAN

Blitz’s Hope William-Smith caught up UNSW music student and percussionist Stuart Ryan.

What is it about music that you love? I’ve always been around music, my mum is an accompanist and piano teacher so there was always music at home while I was growing up. It was kind of inevitable that I would love music.

Do you get nervous when you perform? Absolutely. I’ve always had a hand tremor which can get worse under the slightest stress, or if it’s early morning, or the stars aren’t aligning correctly, or my hands just feel like being annoying. Although I’m generally getting better with nerves, it still can be a major problem. The times when I’m least nervous are when I manage to pretend that I’m completely emotionally uninvested, or if I’ve already performed the piece several times and I really do know it backwards.

What are the best performances you’ve participated in? I’ve had great experiences both inside and outside the uni. I played the snare part in Ravel’s Bolero in my first year with the orchestra which was much more enjoyable than you might think. Outside uni there are too many things I do to list (like playing in musicals, operas, and many other orchestras/bands), but the upcoming ones I’m most excited about are playing Steve Reich’s Music for 18 Musicians in a few weeks and playing a concerto with the Sydney Youth Orchestra next year, having recently won their competition.

THERE’S SOMETHING ABOUT STANDING IN FRONT OF A FULL ORCHESTRA AND BEING REALLY EXPOSED THAT MAKES FOR A VERY INTENSE EXPERIENCE.

Space-grown salad eaten for the first time

For the first time astronauts can enjoy red romaine lettuce grown on the International Space Station. Half the leaves will be cleaned with sanitising wipes containing citric acid before being served and the other half are being sent back to Earth.

Scientists use the power of acoustics for real-life levitation

Scientists at Argonne National Laboratory have found a way to use sound waves to float droplets of liquid in what looks like a cool party trick – except it’s more than that. The real benefits are for the pharmaceutical industry. Sound waves can help scientists see how drugs react in a solution with minimal contact.

LG Display unveils incredible new flexible televisions

Your next TV could be paper-thin, 55 inches wide and weigh less than 2kg thanks to LG's new flexible TV panel – all while still offering high definition. The best bit? You can roll it up or stick it up on a curved wall with magnets!

The theme of this issue of Blitz is sport. In my opinion, people who actually like sport are divided into two distinct categories: those who live to play it and those who live to watch it. And by watch it, I mean put the TV on one of the channels that has sport on it then lie down on the couch with one eye shut, with an esky and a determination not to move unless it’s 100% necessary. This is dedicated to all those wonderfully lazy humans that fall into the latter category - my brothers and sisters in laziness. Some call them couch potatoes. I call them Laziness Experts.

Making plans with a bona fide lazy-bones is a thing that should only be attempted by someone who has experience in the area of social interaction with lazy people. Being on time is a joke. That’s because Laziness Experts’ best friend is their couch, whom they occasionally cheat on with the bed (or someone else’s bed), and getting up from on top of their best friend is way, way harder than it looks. Other things that are harder than they look: getting dressed, finding shoes, finding your keys, finding the front door and finding the will to leave the house.

While other people are majoring in stuff like ‘Science’ and ‘English’, we Laziness Experts major in something called ‘I’m Not Doing That.’ We get HDs almost every time. Prescribed electives include eating in bed, reaching for stuff and laughing at people who do exercise. Optional electives include ordering stuff on the internet so that you don’t have to leave the house to go shopping and randomly bursting out with life-affirming statements, such as, ‘THERE IS NOTHING I ENJOY MORE THAN SITTING ON MY ASS.’ And we really mean it.
Blitz tracked down UNSW media student Georgie Meredith to chat about studying abroad at McGill University in Montreal, Canada.

What university did you go to in Montreal?
I studied at McGill University in Montreal. It's main campus is this gorgeous, old building that looks like a castle in the centre of the city, and all the faculties are spread out among little terrace buildings along the streets.

Why did you decide on Montreal for exchange?
I'd never been to North America before, but the idea of going to a European city was also appealing. Montreal fell perfectly in-between the two in terms of culture and lifestyle so I thought: why not? I initially knew nothing about the city or Canada itself so had no expectations or any idea what to expect. I can safely say that choosing to study in Montreal is the single best decision I've ever made.

What's been your favourite tourist activity?
There's been so many it's hard to choose. Getting to sit front row of a New York Knicks game in Madison Square Garden was so much fun. Hiking through Banff National Park in Canada was out of this world. And scuba diving among the shipwrecks off Barbados’ Carlisle Bay was just insanely beautiful.

What's the craziest thing you've gotten up to while abroad?
The McGill Winter Carnival, 2015. It’s kind of like Unigames but without the sport. I don’t think I can say much more than that. It was the most outrageous seven days of my life and a hell of an introduction to life at McGill.

What's the weirdest food you've eaten?
Montreal is famous for a dish called Poutine. It’s French fries and cheese curds smothered in a thick gravy. A lot of people get smoked meat or bacon as an addition. It’s pretty disgusting but it’s the ultimate drunk food.

What surprised you about Montreal?
The community that's been formed by the students at McGill. Students have such pride for their school and genuinely love getting involved in everything they do whether it’s playing football or being part of the theatre society. The city is buzzing with young people meaning that everything is cheap and easily accessible. Every single one of the beautiful little houses around the campus are occupied by students of the university meaning there’s always a party or something fun going on.

What's the biggest challenge you’ve faced while on exchange?
Having to leave. I don’t think I’ve ever felt so at home in a different country before. I also don’t think I’ve cried as much as I did in the cab leaving for the airport.

Did you brave a Canadian winter?
I didn’t even know what winter was until I arrived in Canada. I landed in Montreal on New Years Eve where it was a mild -27ºC and remained at sub-zero temperatures for a good two months. I actually remember the first day it was above 0ºC – I’ve never seen so many people outside before. It sounds unbearable but it was so different from what I’m used to and made the warmer months there even more enjoyable.

Any tips for students going on exchange?
Don’t just think about living on campus or in international accommodation. I moved into a house with four Canadian girls who became my best friends – we literally did everything together and through them I made so many other friends, all of whom are Canadian. Don’t hesitate, just do it. You can travel any time you like but you can never study and live with students like you can on a university exchange. No matter where you go you will have an incredible experience.

RAPID FIRE

Exchange in three words:

Ice hockey or lacrosse?
Beer pong?

Your opinion of maple syrup?
It will always and forever be better in Canada.

Have you started adding ‘eh’ to the end of all your sentences?
I swear it comes naturally now.

Keen to go on exchange? Check out student.unsw.edu.au/exchange for more info.
It's getting to that time of semester where your brain needs a little boost; a helping hand to get through the long nights of cramming. Instead of burning out on energy drinks that are packed with sugar, consider some of these brain-boosting foods that are just the right size to sneak into the library as a study snack. Your cranium will thank you for the nourishment when you can remember those vital facts during your next exam.

**Avocado**

It may not seem a likely study snack but avocado on toast is the smartest way to start the day. It’s a powerhouse of a fruit (that’s right folks, it’s fruity in nature) and is rich in omega-3, omega-6, vitamin E and K and potassium. Combined with some fresh, wholegrain bread, your brain and your belly will be thanking you all the way to lunch. For extra yumminess add some grilled haloumi.

**Almonds**

Though you may need to be rich to buy them, these bad boys are definitely rich in benefits. They’re a great source of protein, zinc and vitamin B6 and E which all help to boost your energy, repair brain cells and slow down the ageing of brain cells that impact memory.

**Blueberries**

Small but powerful, researchers have found that binging on a bowl of blueberries in the morning can boost your memory and concentration up to five hours later. Full of antioxidants, they will help improve the communication between neurons, improving memory, learning and all cognitive function.

**FLOURLESS BANANA CAKE**

**BY MANA OHORI**

**PREP TIME:** 10 MINS  
**COOK TIME:** 40 MINS  
**DIFFICULTY:** MEDIUM  
**SERVES:** 6

**DIRECTIONS**

1. Pre-heat oven to 200 °C (180° fan forced).  
2. Put all dry ingredients in blender and blend them for 10 seconds until they become coarse powder.  
3. Mush banana with the back of the folk.  
4. Add all the other ingredients including blended powders from 1.  
5. Mix well.  
6. Transfer the mixture into a cake tin with baking paper lined. Sprinkle some nuts on top.  
7. Bake for 30 to 40 minutes.  
8. Eat while it’s hot or toasted the next day with butter.

**TIPS**

You can slice one banana into coins instead of mushing them all. It will melt as you bake it inside the bread.

**INGREDIENTS**

**Dry**

- 1 cup rolled oats  
- 1 cup desiccated coconut or coconut flakes  
- 1 tsp baking powder

**Wet**

- 2-3 ripe bananas  
- 2 eggs  
- 100g butter or coconut oil  
- 2 tsp cinnamon powder  
- 1 handful sultanas  
- 1 handful nuts (walnuts, cashews, pecans)  
- Brown sugar (optional)

All the ingredients are available at Thoughtful Foods, a volunteer-run organic food co-op providing ethical, minimally packaged, affordable whole foods on campus. Find out more at thoughtfulfoods.org.au

Gayby Baby

Directed by Maya Newell

Maya Newell’s feature film debut, the crowd-funded documentary *Gayby Baby* (2015) follows the lives of four kids, Gus, Ebony, Matt and Graham, whose parents all happen to be gay. As each child wrestles with the inevitable personal change of growing up, the world around them wrestles with the issue of marriage equality, and whether or not kids of same-sex families are at risk. The film was five years in the making, nominated for an AACTA this year and reminds everyone that there is more than one way to make a family.

*Gayby Baby* is a compelling look at children of same-sex couples, as told by the children. It’s a compassionately made doco that’s ultimately all about our similarities and not our insignificant, surface differences. The best part of the doco is that it’s funny, heart-warmingly so, with a charming innocence that only an unscripted child can achieve.

The vibrant, outgoing personalities of the four children are at the heart of this fly-on-the-wall, largely observational-style documentary. The film’s underlining message is that two loving parents—ANY two loving parents, whichever gender they may be—equates to the best-case scenario for their child.

Whilst politics obviously play a part, Newell largely allows the drama to unfold naturally. Thus, the film is more about traditional parental struggles rather than in-your-face activism.

As If!

By Jen Chaney

ICYMI, *Clueless* is an adult now, having turned 20 last month. Ugh, as if! Cher’s iconic catchphrase is also the name of this book, and boy, oh boy, it’s a 10/10. Would recommend this book to anyone who is, like, totally butt-crazy over the movie.

In it, Jen Chaney deserves two enthusiastic thumbs up for interviewing the *Clueless* squad, covering everything from the casting process to why the 1995 classic still endures today.

So, if you ever wondered who else was, like, in the running for Cher and Dionne, *As If!* has got you covered. Okay, and does it cover, like, how the movie’s slang came about? Yep, *As If!* has the answer. Sweet, and does it, like, cover the time Cher and Tai made a cameo at the Val party? Uh huh, *As If!*’s got it. In fact, there’s, like, a chapter dedicated to the key scenes of the ’90s gem, so no sweat, pal!

*Yuck*

By Alpine

Alpine wins the most misleading album title of the year with *Yuck*. The album hints at ecstatic pop but reigns in the excitement, maintaining a cruisy and laidback persona. Airy vocals continue to be a signature for Alpine, complemented by the steady guitars and drums which lie at the very root of their sound. Ratings of *Yuck* will depend on the listener’s preference for consistent, recognisable sounds or new influences. If you’re okay with well-meant repetition which aims at creating a vibe rather than music to theorise upon, this album is one to add to your playlist.

*Foolish* and *Damn Baby* are sensual tracks, full of dreamy lust. The innocent-sounding vocalists are anything but hilariously dirty minded individuals who love to swear. This contrast is unforgettable when watching them perform and getting knocked out by their vivacious on-stage personalities.

Alpine have succeed at delivering chilled out tunes that any Triple J lover will appreciate (myself included). It doesn’t seem fair to restrict the band to indie pop when they are in a gradual process of evolving their sound, even if only by taking small steps. If you get a chance to see the band live, don’t pass it up, on stage the girls dress like David Bowie’s twin sisters and their running commentary will keep you wildly entertained.

Wayward Pines Season 1

Moving to Wayward Pines would mean getting your dream white picket fenced home fully furnished for free and a comfortable job without needing an interview. The downside, your every movement is monitored by surveillance cameras and microphones and you can never escape its electric walls.

Based on The Wayward Pines Trilogy by Blake Crouch, it follows FBI agent, Ethan Burke and his unfortunate fate of being stuck in Wayward Pines. There’s no way out as he tries to unravel the mystery behind the town and its very odd residents.

Produced by M. Night Shyamalan, the man behind The Sixth Sense, The Last Airbender and Devil, Wayward Pines scores well with the creep and thrill factor. You will definitely be hooked with each episode unravelling tantalising segments of the mystery. There is no reason not to add this series to your watch list.

Paper Mario: Sticker Star

Nintendo

With the game changing Mario Maker out, what better way to indulge your Mario obsession than with the nostalgic goodness of Paper Mario: Sticker Star? This puzzle-based game is an instant classic complete with enough challenges to keep the player engaged for hours on end.

The blend of both 2D and 3D animation within the game is a far step away from the usual forms of Mario games.

The increased interaction with the toad people within Princess Toadstool’s kingdom is one of the games most notable features as it really gives the game a unique flair. The overall style within the game can only be described as the cutest depiction of Mario characters to have ever graced my miniature 3DS screen.

The ingenuity of the animations presented in this hand-held game is nothing short of brilliant. The free-roaming levels, combined with a completely soothing soundtrack, create a charming and engaging video game that deserves plenty of praise.

Paper Mario’s method of drastic changes to gameplay is something to be embraced and celebrated. With the release of the re-vamp of the paper Mario series, Nintendo truly did create something magical.

Joe Mande

At The Giant Dwarf

Joe Mande started his show by apologising for his lack of jokes. I thought this was an odd thing to do for someone who makes a living out of being funny.

‘I usually walk around a city trying to think of jokes. All that I wrote down was that Sydney seems like a nice place to live and there are lots of Asians. More of a racist observation than a joke,’ he said.

He then compared America to a meth addict because it has its own measurements and is super powerful and paranoid. ‘America’s a strange place. You realise that after you’re out of the country a while,’ he remarked.

It was a comedy show with no boundaries. He talked about his time at Jewish summer camp where an episode of explosive diarrhoea brought him closer to god, after other kids blamed the event on a small bear (until they found his stained boxer shorts in the bathroom).

I walked out from the show feeling satisfied and giggly. After suffering from a case of the butt numbs, my only suggestion is that Giant Dwarf replaces their lawn chairs with something softer on the backside.

LEADERSHIP LABS

Blitz’s Ammarah Tasneem found out about Arc’s new leadership program, Leadership Labs.

What does Arc’s Leadership Labs involve?
It’s a six-week course that tackles six important leadership topics: Self-Awareness, Emotional Intelligence, Conflict Management, Assertiveness, Ethics & Responsibility of Leadership, and Decision Making. Each of the six classes will be centered on a facilitation that allows students to practice and explore leadership tools and characteristics.

Where did the idea come from?
The idea for Leadership Labs was sparked by a need we observed at UNSW for students to have the opportunity to gain practical, hands-on, application-based leadership tools. The model is based on Stanford University’s Leader Labs course, which is a requirement for all students getting their Masters in Business Administration at Stanford. Arc has secured experts in the field to teach and facilitate each topic, giving students direct access to professionals with whom they would likely not have otherwise encountered.

What will be taught in the workshops? Who will be leading these?
Arc has identified Self-Awareness, Emotional Intelligence, Conflict Management, Assertiveness, Ethics & Responsibility of Leadership, and Decision Making as some of the most relevant topics – for both men and women – in leadership today. Each of these topics will be taught by a leading expert from around Australia, hand-picked by Arc.

Is there a selection process involved? What are the important dates?
Any student can apply. Acceptance is highly competitive and all applicants are encouraged to apply early and include any relevant experience and references. Only 30 students will be invited to participate in the course. Applications are available through Arc’s OrgSync at orgsync.com

What type of skills do the students take away from this program?
First, students will learn what competencies, strengths, and weaknesses they already possess. Building from this self-awareness, students will not only gain confidence in their leadership, but will gain skills and tools in an array of significant leadership topics. Students will increase their professional network and gain invaluable expertise that will significantly impact both their time at university and their aspirations and career beyond UNSW.

**Ben**

Do you find any sport confusing?  
Bowling. I find the counting of the score confusing.

Pikachu or Charmander?  
Pikachu because who goes for Charmander?

What is your go-to song to de-stress?  
Classical music. Just put on a two-hour mix of the classics and let it play with some rain in the background.

---

**Katrina**

What sport do you find confusing?  
I don’t get why people play croquet. It’s a more pretentious version of golf and golf is already pretentious.

Do you follow any sport?  
I’d rather not watch a bunch of sweaty people do activity together.

What is your go-to song to de-stress?  
The DK rap from the game Donkey Kong 64 - the lyrics are simply inspiring.

---

**Sarah**

Do you find any sport confusing?  
League of Legends. Maybe because it’s not physical.

Pikachu or Charmander?  
Pikachu because it’s Pikachu. You can’t choose Charmander!

What is your go-to song to de-stress?  
No music because I like the music of silence.

---

**Sharon**

Do you find any sport confusing?  
Curling. I have no idea what they are doing.

What would be your beverage of choice at Unigames?  
Gin and tonic.

Do you follow any sport?  
Australian Open from start to finish. It’s a family affair.

---

**Niro**

Do you find any sport confusing?  
I don’t understand how they calculate the points for extreme ironing. It’s where people skydive out of planes and iron.

Do you follow any sport?  
I follow tennis from quarterfinal onwards, and the same goes for cricket.

Pikachu or Charmander?  
Charmander. Its final evolution is a giant dragon, as opposed to a tiny mouse.
In Cinemas September 24
